WIR keeps

your systems

running!

WIR is the expert for your systems

For over 30 years, we have been dedicated to keeping automation and intralogistics systems running smoothly – with expertise, precision, and passion. Independent of manufacturers, we deliver smart, end-to-end service: from maintenance and inspection to critical repairs.

Our goal is 100% customer satisfaction – achieved through the optimal preservation of technical assets, with a clear commitment to sustainability and long-term responsibility.

JÖRG SCHLEGEL

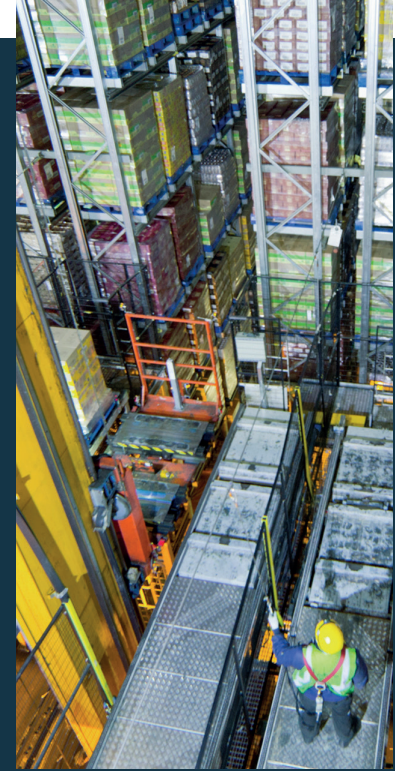

Maintenance from a to z

- Comprehensive maintenance of automation and intra-logistics systems
- Manufacturer-independent work in line with the latest standards
- Optimization of system performance and efficiency
- Ensuring smooth production and minimizing downtime
- Complete maintenance documentation and UVV compliance
- Employee training on maintenance processes and occupational safety
- Monitoring and improvement of safety standards
- Repair of racking and conveyor systems

Inspection according to DIN standards

- Inspections with state-of-the-art camera technology for large and high-bay warehouse systems [optional: photo and video documentation]
- Inspection of racking systems according to DIN EN 15635 and crane installations according to DGUV 52 (BGV D6)
- UVV inspection of technical and safety-related equipment (DGUV Regulation 108-007)
- Electrical inspections of stationary machines (DGUV 3)
- Identification of potential risks and hazards
- Ensuring compliance with legal regulations
- Improvement of occupational safety and accident prevention
- Expert inspection of system components and functions
- Preparation of reports and recommendations for system optimization

Repair with certificate

- Fast and reliable repair of automation and intralogistics systems
- Elimination of faults and malfunctions to maximize system availability
- Deployment of certified experts with specialist knowledge
- Manufacturer-independent repairs using state-of-the-art technology
- Minimization of repair times and prevention of production downtimes
- Repair of bridge, gantry, and slewing cranes as well as freight elevators
- Use of high-quality spare parts and materials to ensure system integrity

Greater flexibility through strong and reliable partners
